

## **August 2001**

This distribution contains change pages for patch WV\*1\*12 of the Women's Health 1.0 User Manual.

The following documentation change pages should be inserted before these replacement pages:

<u>File Name:</u>	<u>Patch:</u>
WV_1_P9_UM.PDF	WV*1*9
WV_1_P10_UM.PDF	WV*1*10
WV_1_P11_UM.PDF	WV*1*11
WV_1_P14_UM.PDF	WV*1*14

Patch WV\*1\*12 pages:

<u>Replace Pages:</u>	<u>With Pages:</u>
5.1-5.2	5.1-5.2

# Chapter 5 Management Reports Menu

## WV MENU-MANAGEMENT REPORTS

### Management Reports

The Management Reports Menu contains options that provide program management reports and a limited set of epidemiological reports. The remainder of this section will briefly describe each of the options under the Management Reports Menu.

### Menu Display:

Select OPTION NAME: **WV MENU-MANAGEMENT** REPORTS

Management Reports

WOMEN'S HEALTH:                      \*    MANAGEMENT REPORTS    \*                      HINES DEVELOPMENT  
=====

PS      Procedure Statistics Report  
SN      Snapshot of the Program Today  
RS      Retrieve/Print Earlier Snapshots

<sup>1</sup> Patch WV\*1\*14 April 2001 Change in option name

<sup>2</sup> Patch WV\*1\*11 June 2000 Added option for MST

## WV PRINT PROCEDURE STATS

### Procedure Statistics Report

<sup>1</sup>This option provides a report on the different women's health procedures performed at the facility. This report is sorted by facility. Data is broken down by veteran and non-veteran, and the numbers of procedures which have results of normal, abnormal, and no result. It also provides a count of patients who have had the respective procedures, whether or not they are veterans and if the results were normal, abnormal, or no result available. All results are also expressed as percentages. A list of any procedures that are not linked to a facility appears at the end of the report.

This report first asks you for a date range, the group of procedure types to be included, if you wish to display statistics by age group, facilities to be included in the report, and a device. If you answer 'Yes' to display by age group you will be instructed to enter the age ranges you wish to select for in the form of: 15-29,30-39,40-105. Use a dash '-' to separate the limits of a range, use a comma to separate the different ranges. NOTE: Patient ages will reflect the age they were on the dates of their procedures. (Patient ages will NOT necessarily be their ages today.)

It is important to note that in the patient's section for each procedure type, the total may be less than the sum of the three results categories (normal, abnormal, and no result). This is because any individual patient may be included in all three categories of normal, abnormal, and no result. A patient may have received more than one procedure during the date range selected, and those procedures may have had differing results. Each results category simply gives the number of patients who fell into that category for the date range selected. The total, however, gives the total number of patients who received that procedure type for the date range selected, the report counts each patient only once, no matter how many times she may have had the procedure. For this reason, the total for the patients section may be less than the sum of the three results categories. Procedure data is stored in the WV Procedure (#790.1) file.

### Report Description:

The report displays a table sorted by procedure types and patients, listing the count, number of veterans and non-veterans, and the results of the procedures (normal, abnormal, and no result). Radiology credit (regular credit, no credit) is displayed for mammogram procedures.

---

<sup>1</sup> Patch WV\*1\*12 August 2001 Sort by facility added to report, and list of any procedures without a facility added
